

### I2C Library Update

ajay\_bhargav, Sat Jul 29 2006, 05:10 pm

All new I2C library written in C Language to work with any 8051 controller.

it provides many new features like Bus Fault detection, Busy Bus detection, Slave not responding detection etc.

the data rate achieved from this code is 62,631 Bps. can be increased changing number of NOPs.

if you make the changes in NOPs.. and try to increase the speed.. its not mandatory it will work.. so do it at your own risk... i am happy with this speed

visit download section today..

happy programming !dance
